

A Solution For Centralized Procurement

www.procurebox.com

What Is Procurebox?

- ◆ Procure Box is an application that bridges the gap between gas distributor and big giant consumers i.e. Domino's, KFC and many others that requires number of cylinders.
- ◆ With the leverage of Procure Box application, the consumers can painlessly book the gas cylinders in a very easy and quick way. Adjacently, the consumers, as well as gas distributor, can also view the present status of their gas cylinders booking and can track where the cylinder has reached.

Our Future Plans

- Supplying Domestic Cylinders to Consumers
- Distributing Petrol and Diesel Supply
- LPG Refilling Orders Intake

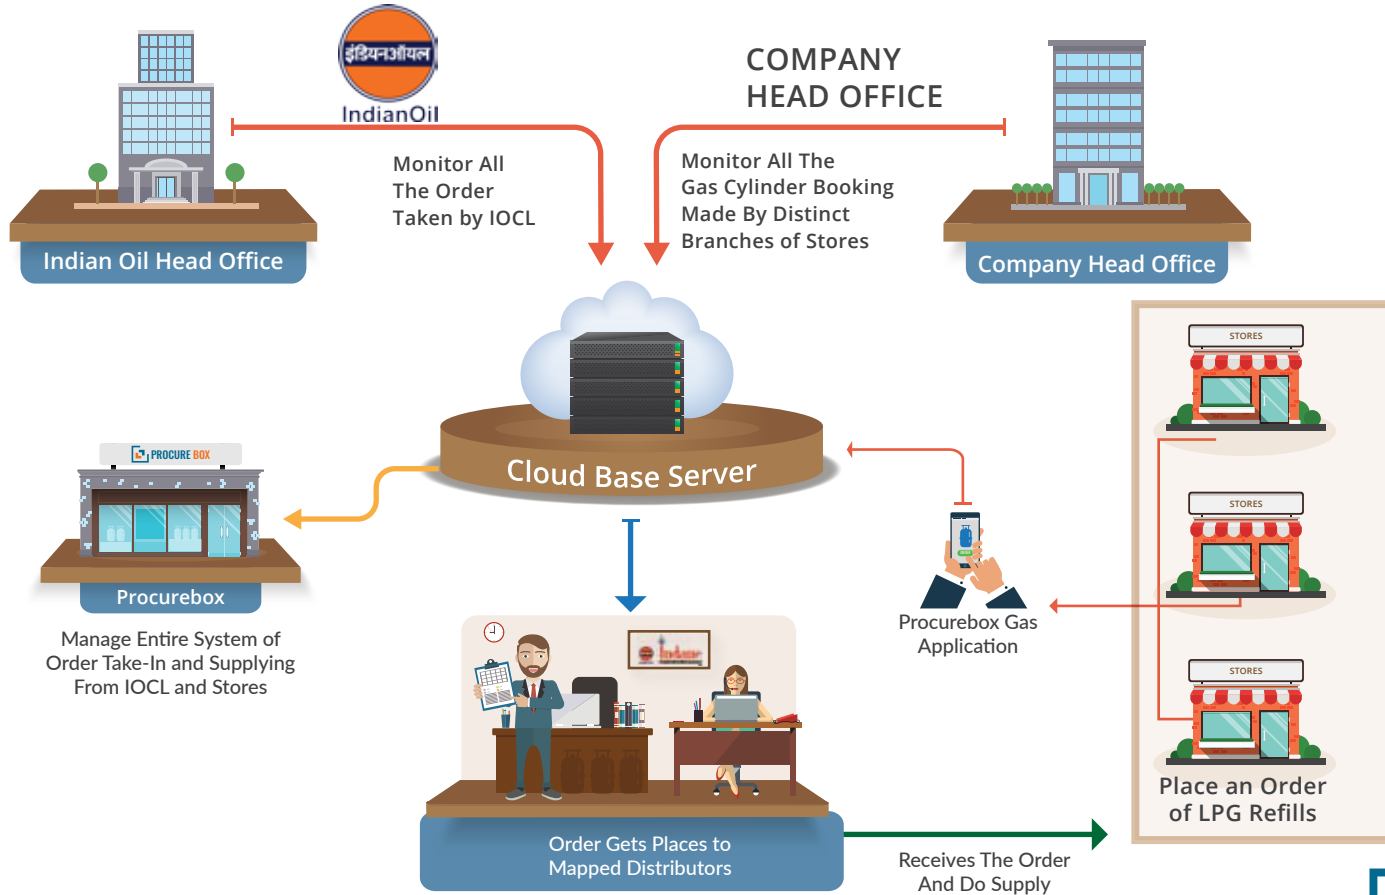

HOW IT WORKS?

- ♦ Through our designed application the gas distributors can view the number of orders for gas cylinder delivery on a daily basis. Each distributor is given a SAP and branch code. By entering the SAP code of a distributor the entire history of gas distributor can be easily fetched up i.e. it's personal details, number of orders taken, number of orders delivered, payment details and many others.
- ♦ With a large server storage capacity more than 50,000 invoice bills can be saved at a time in a system. On the other side, it is very much fruitful for the consumers to book the gas cylinder just by clicking on it.
- ♦ The consumers can view the cylinder price rate before booking and time of delivery before placing an order. Hence, with the leverage of this application by consumers and gas distributors the communication process has been fasten up and there is no involvement of paperwork to be done manually.

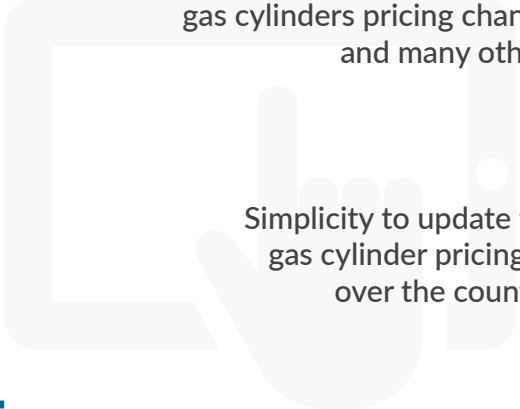

LPG ORDER AND DELIVERY FOR COMMERCIAL CYLINDERS

Supplier (Indian Oil Corporation Limited)

The main distributor of cylinders is IOCL. By the IOCL cylinders do get dispatch to the distinct gas cylinder distributors wide-spread all across India. The gas cylinder distributor supplies the cylinder to the consumer upon receiving their order.

Glance all the important updates and notifications of gas cylinders pricing changes and many others.

Simplicity to update the gas cylinder pricing all over the country.

Can view all the gas cylinders order booking and supply through their controlled panel.

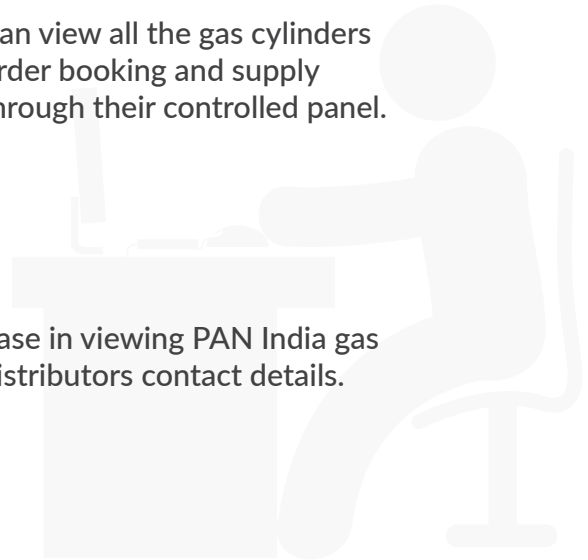

Glance all the important updates and notifications of gas cylinders pricing changes and many others.

Ease in viewing PAN India gas distributors contact details.

Ease in viewing PAN India gas distributors contact details.

IOCL Level 2 (Area Manager)

.....

The Area Manager is the intermediate person between IOCL and field officer.

He is responsible for the total supply of gas cylinders to all the stores distributed in his area of work.

For every area of city, there is an Area Manager who supervise all the things right from the order to till the delivery of cylinders.

All the vital information of distributor details, delivery boy contact information and other necessary things are being saved with the Area Manager. He can directly contact to any person for finding any particulars.

If there is any issue regarding any matter, then he is the foremost concerning person to resolve it and ensure that everything is properly working.

For any problem regarding the shortage of cylinders or any other operational concern, he is the responsible person for resolving it.

IOCL Level 1 (Field Officer)

There is a field officer person who is below the Area Manager and it is his responsibility to handles all the distributors under him.

For announcing any important information to all distributors he is the in-charge person who is responsible to give the answers.

The field officer is the person who is in direct contact with the distributor and knows all the information that how many cylinders are going to get dispatch in the entire day, what is the storage capacity of every distributor and payment details from all the consumers.

If in case, the delivery boys are facing any issue with the distributor then they can directly contact to the field officer. The field officer has to confirm that the delivery boys have good transportation facility for delivering the gas cylinders to consumers.

For supervising the payment from all the stores and their credit limit, the field officer has to keep an eye on the accounts of every store.

DISTRIBUTOR ADMIN

It becomes easy for the distributor to take the gas cylinders order online rather than on phone calls.

Takes feedback from the customers for improving the services.

For the late delivery automatic alerts send to the upper authority members of IOCL.

The IOCL has coordination with food chain restaurants for the continuous supply of gas cylinders to the distinct stores running all over India.

On the other side, the delivery boy gets a notification for the order received from the store. It fastens the process of delivery of cylinders that took around 2-3 days to a maximum of 3-4 hours for the delivery on the door-step of store.

With a contract agreement and understanding between both, the alliances deal for online booking of gas cylinders has been considered through Procure Box.

Through Procure Box the food chain restaurants store manager are easily able to book the cylinder by logging into the Procure Box.

Being an intermediate between Company's head department of administration and field manager of stores they are responsible for streamlining the business.

For any gap in the form of miscommunication, late delivery of cylinders at the store or anything else the administration has to take a step and further contact the Area and Field Manager for their response.

The food chain restaurants are having branches all over India. In every store, there is a supply of commercial cylinders. The administration department has to take care that how much consumption of cylinders is being made by the individual store in a day, week and month.

All the payment details in the form of invoice or bills are being sent to the administration for the approval. After receiving approval from them for doing the payment, the store manager is entitled to clear the due amounts to the gas distributor.

Company's Admin Level 1

The reporting of all store manager of food chain restaurant is being headed by Company's Manager.

The field manager has to overview the records of every store. For example, the number of cylinders on an average consumed by the store. The present number of cylinders the store is having and it's financial status. All these information are being shared by the store manager to its upper authority members.

The store manager has to first approach the upper management staff for any new demand regarding the cylinder supply or advance money intake. Apart from it, if the store is facing any problems than they can directly approach the upper authority for solution.

All the updated reports of daily order of cylinders by every store can be viewed by the Administration. It gives them an overview that how much gas is being consumed by every store.

STORES

The store manager doesn't need to make frequent calls for the supply of gas cylinders.

With the leverage of Procure Box system, the delivery date of gas cylinders can be known in advance.

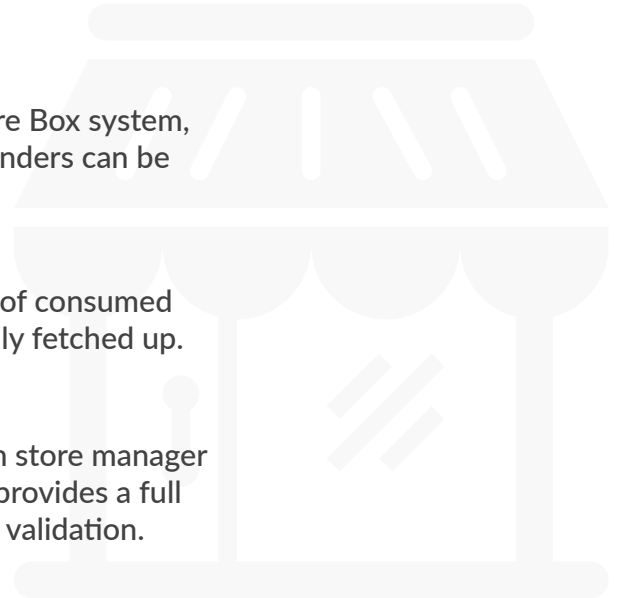

The entire payment details of consumed gas by the store can be easily fetched up.

For a transparency between store manager and distributor the system provides a full clarity for the evidence and validation.

Through Support Tickets the store manager can report the technical or operational issues to the administration.

ADVANTAGE TO USERS

- ✦ With the ease of Procure box online platform the entire process of ordering the gas cylinders can be completed in 20 seconds.
 - ✦ The entire manual work has been eliminated. All the vital information can be easily viewed by accessing the Procure Box system.
 - ✦ The working process has become fast, efficient and transparent with the usage of Procure Box.
- ✦ Having cloud-based server it has large storage capacity of storing more than 50,000 invoices of bills.
 - ✦ With the enhanced features of Netbanking the store manager can easily do the payment without facing any hassles.
 - ✦ Proper tracking of all the activities and a detailed insight of any order can easily glance.
- ✦ With all the work streamlined, the logistics and shipping department doesn't have to look at multiple things.
 - ✦ By working on Open Source error tracking mechanism the back-end team of developers can monitor all the activities happening on the portal as well as quickly bug-fix the issues.
